

Senior Lighting Designer

London

An exciting opportunity for a Senior Lighting Designer to join an award-winning architectural lighting design team, working on a wide range of prestigious and exciting projects nationally. You will work closely with high profile clients and the design team, designing projects from early concept, through to completion, producing high quality, detail focused information.

This is a great opportunity for an enthusiastic senior designer to join a growing team, where you can grow and progress through the company.

The successful candidate will be able to manage their own projects from start to completion to deliver high quality lighting design schemes to clients, working with both internal and external design teams. This will involve working on a variety of architectural projects across different sectors including commercial, retail and leisure.

Candidates will preferably be degree or LIA qualified and be able to demonstrate practical experience working within a similar role within a lighting design consultancy. Whilst this role is based in our London office, the Architectural Lighting team support our design teams nationwide, so some travel may be required.

Duties and Responsibilities:

- + Manage and lead design projects from early concept through to completion, delivering high quality and detail-orientated work
- + Assist the team and wider business units with lighting design concepts
- + Compile and present design concepts to clients, architects and other members of the project design team
- + Site visits for commissioning and snagging
- + Being involved in the day-to-day running of lighting projects, overseeing and supporting junior members of the design team
- + Support and deliver projects nationwide and willing to travel when required
- + Commit to supporting the strategic business' sustainability policies and the internal environmental programme objectives

Established over 60 years, our company operates nationally from seven offices across the UK. We invest in our people to grow and retain the best engineers. We are recognised as one of the best at growing our people through training and development. We were one of the first companies to be awarded the Platinum Investors in People accreditation across the globe.
