

# Electrical Engineer

## London

### Purpose of Job:

We are looking for an established Electrical Engineer to join our busy building services design team based in our London office.

Applicants will already be working at a similar level and ideally have the desire to progress their career to a management position. Candidates will preferably be degree or HND qualified and have attained or be working towards their relevant grade of professional membership (IEng/CEng). Candidates should be able to demonstrate relevant skills and experience within a similar role.

### Duties and Responsibilities:

- + Provide input on design strategy and conceptual design relative to electrical installations
- + Undertake design calculations relevant to the design of electrical installations within major building projects
- + Design electrical installations including the production of design drawings, diagrams and schematics along with project specifications and schedules
- + Design electrical installations to meet all existing, relevant British Standards, Building Regulations and other relevant standards
- + Design electrical installations to meet requirements for energy efficiency and low carbon requirements
- + Able to work as part of a team to meet project brief and programme requirements on electrical design
- + Support senior members of staff in managing client and design team relationships
- + Demonstrate a wide knowledge and relevant project experience of electrical systems across a range of sectors
- + Commit to supporting strategic TB+A sustainability policies and our internal environmental programme objectives.

### Training Programme requirements:

- + Commit to goals and objectives of a career development programme including attendance of in-house and external technical and non-technical training
- + Commit to achieving or maintaining Chartered Engineer status through relevant professional institution
- + Support the development of team members and undertake the mentoring of members of the engineering team
- + Familiarise and learn about sustainable low energy initiatives and to share this with other members of your team and wider within the Partnership

Person Specification:

	Essential	Desirable
<b>Knowledge</b>	<p>Ability to apply theoretical principles to the practical design of building systems</p> <p>Sound knowledge of how buildings are built and the design process that goes into their design</p> <p>Detailed knowledge of engineering design approach and fundamentals of electrical engineering</p> <p>Understanding of the role of the engineer in the design process</p>	<p>Specialist knowledge of particular electrical systems</p> <p>Awareness of energy and environmental related EU and UK Directives / Regulations</p>
<b>Skills</b>	<p>A strategic thinker with a proactive attitude and attention to detail, well organised</p> <p>Excellent team working and inter-personal skills, good communication within a team and externally</p> <p>Good time management and ability to prioritise</p> <p>Good numeracy and literacy</p> <p>Able to present and explain the thought processes and engineering processes behind their own design work</p>	
<b>Experience, qualifications and prospects</b>	<p><u>Qualifications:</u> BEng, BSc, MEng or MSc in relevant engineering subject, e.g. Architectural Engineering, Building Services Engineering or Electrical Engineering or HNC/HND in relevant engineering subject</p> <p><u>Experience:</u> Demonstrable project management skills. Software skills including: Hevacomp/Amtech, Dialux/Relux, IHS, NBS, Microsoft Office</p> <p>Experience in CAD/Revit drafting systems</p>	<p>Specialist interests or qualifications, e.g. renewable energy, low carbon design, BREEAM, lighting design, LCC registration or other relevant topic</p> <p>Experience in Modelling software</p>
<b>Attributes and Personal characteristics</b>	<p>Logical thinker, scientific and analytical – having an engineering approach to problem solving</p> <p>Flexible outlook and attitude to work, approachable and personable</p> <p>Works on own initiative but equally can lead a team</p> <p>Commitment to maintaining high quality standards with an eye for detail</p>	<p>An interest in architecture, landmark buildings and new technologies</p> <p>An interest in renewable energy technologies</p> <p>An interest in environmental sustainability in the workplace and home</p>
